

Mount Laboratories is an experienced supplier of laboratory and scientific equipment.

We specialise in sourcing apparatus and products from top manufacturers around the globe for customers from a wide range of organisations and industries including universities and research facilities, breweries, oil & gas refineries, pharmaceutical industries, hospitals and factories.

We provide our customers with one point of contact, clear communication and a competitive pricing structure. We can despatch a range of products in one consignment saving customers money and time and reducing the burden of administration.

Mount Laboratories has expertise in sourcing safe, reliable, quality-certificated products. In addition, we are always happy to procure items outside our standard catalogue to meet our customers' needs in a fast-changing world.

Based in Loughborough, England, the directors of Mount Laboratories have some 30 years experience of working for, and with, companies such as Fisons, Fisher Scientific and Gallenkamp. Our contacts and expertise in the scientific marketplace give us a competitive advantage over many agents and third parties operating in this industry.

In Africa we are exclusive suppliers of the Nickel-Electro product range such as baths, centrifuges, and crucibles.

Mount Laboratories holds membership of the London and Loughborough Chambers of Commerce, and we are justifiably proud of our reputation for delivering excellent customer service.

We are particularly keen to help Non-Government Organisations obtain the right products at the right prices.
